

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

I am a Senior Citizen who makes no long distance phone calls, uses Tracfone as the cheapest way to have a cell phone which I need to have with me for security and emergency purposes as I travel alone. My land phone bill changes every month from added taxes and fees even though I make no toll or long distance calls. Forcing me to pay the USF the same as high end users simply IS NOT RIGHT! Get your heads screwed on right and stop screwing the consumers!!!

Sincerely,

Lois Peterson
